REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
 - a. As regards the invention recited in independent claim 16, the combination recited in the claim is novel and unobvious. Of particular interest is the recitation of sensing the temperature of the electronic control component. While the placement of a temperature sensor is not new or novel, as well as reducing the fuel flow to a burner in response to sensing a predetermined temperature limit (see at least Bird (6,280,179)). Nevertheless, in combination with the remainder of the elements recited in the claim, the claimed subject matter is allowable. The prior art of record does not anticipate, nor make obvious, the claimed invention, alone or in combination therewith.
 - b. As regards the invention recited in independent claim 30, the combination recited in the claim is novel and unobvious. Of particular interest is the arrangement of the sensor and electronic control components and its relation to the function of the burners. While control of burners in response to sensing a predetermined temperature is not new or novel (see at least Herbert (5,425,353)) the combination of the various components, arrangement, and functionality all contribute to the novelty. Nevertheless, in combination with the remainder of the elements recited in the claim, the claimed subject matter is allowable. The prior art of record does not anticipate, nor make obvious, the claimed invention, alone or in combination therewith.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
